

# Harmony Asian Balanced Fund (Class A-C)

31 October 2024

This is a marketing communication for professional advisors only

## Investment objective\*

The portfolio will be biased to investments in markets of developed Asian and emerging Asian countries, but could also hold investments outside these countries.

The portfolio aims to provide a balance between capital preservation and capital growth with a reduced level of volatility, via strategic exposures to a wide range of asset classes.

## Manager commentary

- » In October, the most significant shift was a big rise in bond yields, reversing much of the move in Q3, which meant that bonds had a poor month, in turn weighing on valuations across most asset classes (with the notable exception of gold). Against this backdrop, trading activity was significant in October.
- » We added the Candriam Global High Yield fund, a strategy focused on the higher quality, less cyclical and more sustainable parts of the high yield fixed income universe which, coupled with falling inflation, easier monetary policy and a supportive macroeconomic environment, should deliver strong risk-adjusted returns.
- » Early in the month, we reduced the portfolio's duration by taking profits on some of the US Treasury allocation, which proved timely as bonds kept falling over the subsequent weeks.
- » We exited the First Sentier Japan Focus fund, as the fund is closing and the investment team leaving, and reinvested the proceeds in the Amundi Japan ETF, to keep unchanged our exposure to a market we are tactically positive on.
- » Finally, we took profits on some of our China allocation. After an incredible rally in late September and a consolidation in early October, we thought it prudent to monetize some and reinvest in other areas that had instead been left behind. We remain overweight China though, conscious that the stimuli and the commitment to the stock market we have seen from the Party and the central bank will provide long-term tailwind to the market.
