

Harmony Australian Dollar Growth Fund (Class E)

29 November 2024

This is a marketing communication for professional advisors only

Investment objective*

The portfolio will be biased to investments in Australia, but could also hold investments outside this country.

The portfolio aims to provide capital growth in Australian dollars but with a reduced level of volatility, via strategic exposures to a wide range of asset classes.

Manager commentary

- » In November, US markets significantly outperformed the rest of the world, with the S&P 500 reaching a new record high and delivering its strongest monthly performance of 2024. European sovereign bonds also fared well as investors anticipated accelerated rate cuts from the ECB. However, there were some areas of weakness. French assets lagged due to concerns over the country's budget, while the Euro experienced its sharpest decline against the US dollar in 18 months, driven by speculation about potential new tariffs. Additionally, the dollar's strength, coupled with broader weakness in other regions, led to negative returns for nearly all non-USD denominated risk assets in USD terms during the month.
- » Against this backdrop, we left asset allocation and manager selection unchanged.
