

Harmony Australian Dollar Growth Fund (Class J)

30 September 2026

This is a marketing communication for professional advisors only

Investment objective*

The portfolio will be biased to investments in Australia, but could also hold investments outside this country.

The portfolio aims to provide capital growth in Australian dollars but with a reduced level of volatility, via strategic exposures to a wide range of asset classes.

Infrastructure	1.4%	Cash & equivalents	0.7%
Property	1.4%		
Specialist financials	0.9%		

Manager commentary

- » During September, we made a small number of tactical adjustments to the portfolio to improve the balance between risk and return opportunities. We increased our allocation to government bonds and emerging market equities, funded by reductions to cash, investment grade credit and high yield credit.
- » The increase in government bonds was driven by the recent rise in sovereign bond yields, which has improved prospective return expectations. We also added to emerging market equities, where valuations remain attractive and earnings growth prospects compare favourably with many developed markets. The allocation was diversified across specialist managers to capture both quality and value opportunities within the asset class.
- » Alongside these changes, we modestly increased our gold exposure after successfully taking profits earlier in the quarter and subsequently re-entering at more attractive levels. We continue to view gold as an important portfolio diversifier and remain alert to further tactical opportunities.
- » Overall, these adjustments resulted in only a modest increase in portfolio risk while enhancing diversification and moving the portfolio closer to its strategic benchmark. In our view, the portfolio remains well balanced, with selective increases in areas where expected returns have become more attractive and reductions in areas where valuations and risk-adjusted return opportunities appear less compelling.
