| Private equity | 0.7% | | |

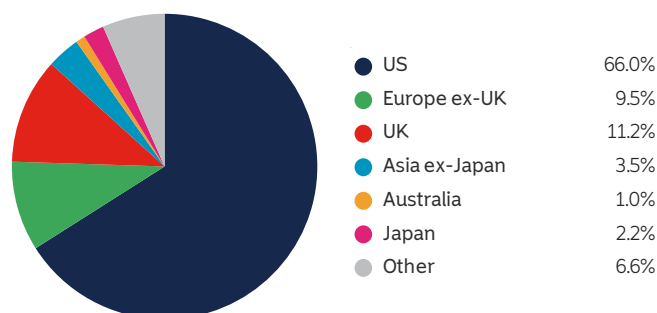

Manager commentary

- » In November, we broadly maintained the portfolio's overall risk allocation, but reallocated away from the riskier segments (at valuation and economic risk) into more resilient exposures, which we view as appropriate at this late stage of the cycle. So, favouring high-quality, defensive active equity managers over the rest, we added the MSCI World Minimum Volatility futures and increased allocation to Aikya Global Emerging Markets, taking from passive equity investments that are heavily concentrated and trading at elevated valuations.
- » We have also reduced allocation to convertible bonds, highly correlated to equities, in particular to growth stocks. Convertibles were introduced tactically a year ago as a targeted way to add US and technology exposure, where we were otherwise underweight. Their convex profile allowed us to participate in further US/tech upside with reduced downside and they have delivered what we bought them for: cushioning the April drawdown while capturing almost all of the subsequent upside. However, given their recent near-delta-one participation in market gains, the likelihood of similarly high-beta participation in any future drawdowns has increased, which argues for a more cautious stance.

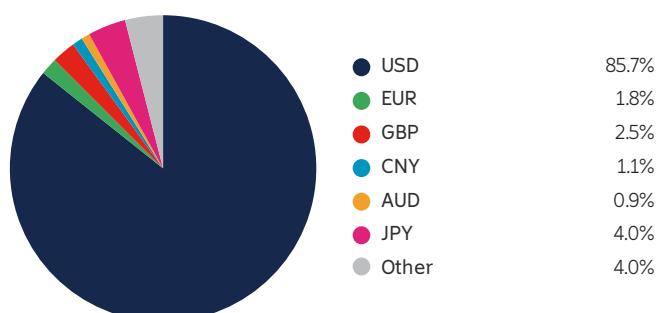

Portfolio holdings - top 20

| Holding | |
|---|-------|
| US Treasury Bonds | 19.0% |
| iShares Global Corporate Bond | 16.8% |
| US TIPS | 5.9% |
