Manager commentary

- » April felt resilient for global markets: equities rebounded as investors rotated back into AI-linked growth themes, while Middle East tensions kept oil and inflation worries alive. Bonds were steadier but not carefree, the dollar had safe-haven support, and emerging Asia stood out thanks to semiconductor optimism, even as risks lingered.
- » In April, we added a small holding in the VanEck Defence ETF, reflecting our view that defence spending is likely to grow steadily over many years. For decades after the Cold War, European countries reduced defence budgets and relied on existing stockpiles. Today, governments are having to do two things at once: modernise their forces and rebuild inventories. This creates strong, long-lasting demand for defence companies. Political support for higher spending is also becoming much clearer. NATO countries have committed to spending more on defence, and European defence budgets have been rising at a fast pace. This is already feeding through into higher earnings for defence firms, with some companies having several years' worth of orders already in hand. While defence stocks have performed well recently, we believe there could still be further growth as this rebuilding cycle continues over the next 5-10 years. Importantly, this remains a small allocation within the portfolio, and we continue to look for other long-term themes that can help diversify returns.

Deferred Subscription Charge - Class D only

The Fund is permitted to make a charge on the sale of Shares to an investor of 5 per cent of the amount subscribed. The amount of this charge is paid by the Fund at the time of the subscription and is deferred and amortised over a 5-year period. Shareholders of Share Class D see the cost of this charge reflected in a decreased Net Asset Value price of Share Class D.

Should an investor redeem before the 5-year period has elapsed, the Fund is permitted to deduct the remainder of the Deferred Subscription Charge from the redemption proceeds for the benefit of the relevant Fund. The remaining charge will be calculated on a first in, first out basis and pro-rata dependent upon the number of Shares redeemed.

Charges will be applied to the redemption proceeds as below:

» Within one year of initial subscription	5%
» Between 1 & 2 years of initial subscription	4%
» Between 2 & 3 years of initial subscription	3%
» Between 3 & 4 years of initial subscription	2%
» Between 4 & 5 years of initial subscription	1%
» After 5 years of initial subscription	No charge

At the end of the month following the five-year anniversary of the original subscription, once the initial charge is repaid in full to the Fund, any remaining shareholding will be automatically converted to Share Class A.

Please refer to the Deferred Subscription Charge section of the prospectus for further details.

Important Information - All data sourced from Momentum Global Investment Management, J.P. Morgan SE - Luxembourg Branch. Allocations subject to change. The value of the underlying funds and the income generated from them can go down as well as up and is not guaranteed. Investors may not get back the original amount invested. The value of investments involving exposure to foreign currencies can be affected by currency exchange rate fluctuations. Performance is calculated on a total return basis, unless otherwise stated. Past performance is not a guide to future performance. The Fund is not managed with reference to a benchmark, but its performance may be measured against one.
