Manager commentary

- » Global financial markets staged a broad rally in June, with equity indices across the world reaching new highs as investors welcomed signs of easing trade tensions and grew increasingly confident of impending interest rate cuts from the US Federal Reserve. A mid-month ceasefire between Israel and Iran also contributed to a more positive risk sentiment, though it sparked volatility in oil markets throughout the month. Global bonds were modestly positive, supported by a flight to safety during what was a volatile month. The US dollar kept weakening, which was particularly supportive for emerging market equities and bonds.
- » Against this backdrop, we left manager selection and asset allocation unchanged in June.
