

Harmony Cautious Income Fund (Class E USD Acc)

31 March 2026

This is a marketing communication for professional advisors only

Investment objective*

The portfolio aims to deliver a stable level of income of 3-4% per annum whilst still maintaining the capital value, via strategic exposures to a wide range of global asset classes.

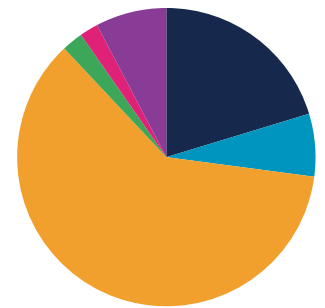

Manager commentary

- » March was dominated by the US-Israel/Iran conflict and the closure of the Strait of Hormuz, which sent Brent crude surging past \$100 a barrel. Global equities sold off broadly whilst government bonds yields rose sharply as markets repriced inflation higher and pushed out rate cut expectations. Bonds and precious metals offered little shelter; energy was the sole bright spot. Against this backdrop, there was significant activity in the Portfolio.
- » In early March, as the conflict started, we moved to a more defensive stance in fixed income, cutting US and European duration and reallocating into money markets. This reflected a weaker rates outlook – especially for long duration – where low term premia, poor sentiment and the risk of fewer US cuts left returns looking unattractive versus risk. Later in the month, where we thought expectations had moved too much in the opposite direction, we added some duration back, in particular by adding a modest UK Gilt exposure, funded from cash. Still, overall duration remains underweight. We also initiated a position in the Assenagon Alpha Volatility, funded by trims to investment grade credit, property and infrastructure. The dispersion-based strategy seeks to monetise mispricing between index and single-stock options, delivering an effectively long-volatility profile with limited carry cost. We sized it below our longer-term target as volatility had already risen and some gains had materialised, but we now see limited downside if volatility eases given elevated equity dispersion. Separately, we switched from Schrodgers EM Value into the iShares EM Value ETF ahead of the fund's closure.
