Manager commentary

- » Markets began to consolidate in January and returns ended the month in a more mixed fashion, compared to the ' (almost) everything rally ' seen in Q4 2023. Global developed and US equities both continued their momentum to reach all-time highs, returning 1.2% and 1.7% respectively. Equity markets in Asia continued to show limited signs of agreement, with Japan posting a 7.8% return, while further challenges in China impacted Emerging Asia, falling 5.2%. UK equities ended the month down 1% after some varied data prints, while European equities outperformed, returning 1.9%. After the bond market rally in December, markets took a step back with global bonds declining 1.3%, following a re-assessment of 2024 interest rate projections. Despite a shaky start, credit markets ended the month undisturbed with a slight 0.2% decline in investment grade. In commodities, a tumultuous month geopolitically, led to a 6.1% rise in oil.
- » Against this backdrop, we left asset allocation unchanged in the portfolio, after a very active last month of the year. On the manager selection front, we exited investments in two UK-focused real estate investment trusts (REITs), namely Ediston Property and LXI. Both had a strong rally since their lows around summer last year, rising by about 20% and 25% respectively, and Ediston announced the disposal of the property portfolio and the voluntary liquidation of the company. We reinvested the proceeds in the iShares Global Real Estate fund, to stay within the asset class but move from a UK to a global exposure.
