## Manager commentary

- » In October, the most significant shift was a big rise in bond yields, reversing much of the move in Q3, which meant that bonds had a poor month, in turn weighing on valuations across most asset classes (with the notable exception of gold). Against this backdrop, trading activity was significant in October.
- » We added the Candriam Global High Yield fund, a strategy focused on the higher quality, less cyclical and more sustainable parts of the high yield fixed income universe which, coupled with falling inflation, easier monetary policy and a supportive macroeconomic environment, should deliver strong risk-adjusted returns.
- » Early in the month, we switched from US inflation-linked bonds (TIPS) to nominal US treasuries, with the view that inflation expectations being priced in by the bond market were excessive, on a 5 year horizon.
- » We also took profits on some of our Asia exposure. After an incredible rally in late September and a consolidation in early October, we thought it prudent to monetize some and reinvest in other areas that had instead been left behind. We remain overweight China though, conscious that the stimuli and the commitment to the stock market we have seen from the Party and the central bank will provide long-term tailwind to the market.
