

# Harmony Global Balanced Fund (Class E AUD hedged)

30 April 2026

This is a marketing communication for professional advisors only

## Investment objective\*

The portfolio will be biased to investments in the United States, but could also hold investments outside this country.

The portfolio aims to provide a balance between capital preservation and capital growth in US dollars with a reduced level of volatility, via strategic exposures to a wide range of asset classes.

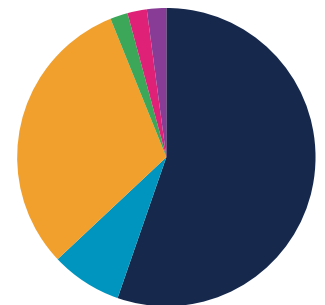

## Manager commentary

- » April felt resilient for global markets: equities rebounded as investors rotated back into AI-linked growth themes, while Middle East tensions kept oil and inflation worries alive. Bonds were steadier but not carefree, the dollar had safe-haven support, and emerging Asia stood out thanks to semiconductor optimism, even as risks lingered.
- » In April, we added a small holding in the VanEck Defence ETF, reflecting our view that defence spending is likely to grow steadily over many years. For decades after the Cold War, European countries reduced defence budgets and relied on existing stockpiles. Today, governments are having to do two things at once: modernise their forces and rebuild inventories. This creates strong, long-lasting demand for defence companies. Political support for higher spending is also becoming much clearer. NATO countries have committed to spending more on defence, and European defence budgets have been rising at a fast pace. This is already feeding through into higher earnings for defence firms, with some companies having several years' worth of orders already in hand. While defence stocks have performed well recently, we believe there could still be further growth as this rebuilding cycle continues over the next 5-10 years. Importantly, this remains a small allocation within the portfolio, and we continue to look for other long-term themes that can help diversify returns.
