

Harmony Global Balanced Fund (Class E USD)

30 January 2026

This is a marketing communication for professional advisors only

Investment objective*

The portfolio will be biased to investments in the United States, but could also hold investments outside this country.

The portfolio aims to provide a balance between capital preservation and capital growth in US dollars with a reduced level of volatility, via strategic exposures to a wide range of asset classes.

Manager commentary

- » In early January, President Trump ordered US strikes in Venezuela that led to Nicolás Maduro's capture and a sudden break in Bolivarian rule—big headlines but limited market impact given Venezuela's small share of global oil output. Attention then shifted to escalating tensions in Iran amid reports of mass protest deaths, alongside domestic backlash after two Minneapolis protesters were killed by ICE patrols. The US also built up forces in the Persian Gulf and clashed diplomatically with Denmark over Greenland, though Trump later appeared to rule out military action at Davos. Markets largely "looked through" this geopolitical noise, focusing on strong US earnings, a steady Fed, and a rally broadening toward small caps (Russell 2000 up -5% vs "Magnificent Seven" slightly down). Asia and emerging market equities rose, bonds were modest, and gold/silver surged on a "debasement" narrative signalling lingering, underpriced risk and some investor complacency.
- » Against this backdrop, we left manager selection and asset allocation unchanged.
