

Harmony Global Balanced Fund (Class E JPY)

31 July 2025

This is a marketing communication for professional advisors only

Investment objective*

The portfolio will be biased to investments in the United States, but could also hold investments outside this country.

The portfolio aims to provide a balance between capital preservation and capital growth in US dollars with a reduced level of volatility, via strategic exposures to a wide range of asset classes.

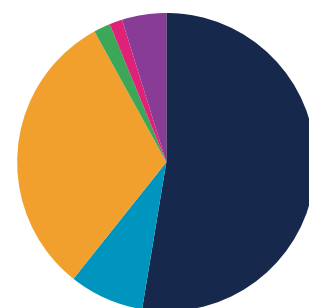

Manager commentary

- » In July 2025, markets remained resilient despite uncertainty surrounding Donald Trump's 1st August tariff deadline, buoyed by optimism that key trade deals would be finalised—which they were, heavily favouring the US. Japan and the EU agreed to 15% tariffs and pledged massive US investments, exposing political weaknesses in both regions. The UK's earlier 10% tariff deal now appears relatively favourable. US economic data was strong, with falling jobless claims, rising consumer confidence, and Q2 GDP growth of 3.0% driven by a sharp drop in imports. Markets were further supported by robust corporate earnings, especially in AI-related sectors, and expectations of future US rate cuts due to a likely dovish Fed leadership in 2026. Equities rallied, led by US mega cap tech, while the dollar surged, dampening returns in other currencies. The UK faced stagflationary pressures, with rising inflation and unemployment. Although some tariff issues remain unresolved, notably with China, the resolution of many deals and the passage of the 'One Big Beautiful Bill' reduced policy uncertainty, boosting risk assets. However, with valuations stretched, especially in AI stocks, a cautious short-term outlook is advised, though the medium-term view remains constructive.
- » Against this backdrop, there were no manager or asset allocation changes in the portfolio.
