Harmony Global Balanced Fund (Class E GBP hedged)

28 November 2025

This is a marketing communication for professional advisors only

Investment objective*

The portfolio will be biased to investments in the United States, but could also hold investments outside this country.

The portfolio aims to provide a balance between capital preservation and capital growth in US dollars with a reduced level of volatility, via strategic exposures to a wide range of asset classes.

Manager commentary

- » In November, we broadly maintained the portfolio's overall risk allocation, but reallocated away from the riskier segments (at valuation and economic risk) into more resilient exposures, which we view as appropriate at this late stage of the cycle. So, favouring high-quality, defensive active equity managers over the rest, we added the MSCI World Minimum Volatility futures and increased allocation to Aikya Global Emerging Markets, taking from passive equity investments that are heavily concentrated and trading at elevated valuations.
- » We have also reduced allocation to convertible bonds, highly correlated to equities, an in particular to growth stocks. Convertibles were introduced tactically a year ago as a targeted way to add US and technology exposure, where we were otherwise underweight. Their convex profile allowed us to participate in further US/tech upside with reduced downside and they have delivered what we bought them for: cushioning the April drawdown while capturing almost all of the subsequent upside. However, given their recent near-delta-one participation in market gains, the likelihood of similarly high-beta participation in any future drawdowns has increased, which argues for a more cautious stance.

Cumulative returns (since Class E USD inception, 08.08.2012)**

Fund performance**

Important Information - All data sourced from Momentum Global Investment Management, J.P. Morgan SE - Luxembourg Branch, Morningstar, Bloomberg Finance L.P. Allocations subject to change. "There can be no assurance that the Fund will achieve its investment objective. Please refer to the Prospectus for full details of the Fund, its charges, the investment objective and investment policy. "Performance figures prior to the inception date of the Class E GBP Hedged share have been simulated by applying USDGBP hedging costs to the non-hedged returns of Harmony Global Balanced Fund Class E USD. ""Peer group median comprises two components: 1) between inception date and 30.06.24, the median return of the composite (i) global peers and (ii) local peers, in the ratio 1:2. This weighting methodology is consistent with the "normal" asset allocation of the Fund, with a two-thirds bias towards "home" country assets and currencies; 2) between 01.07.24 to present, the median return of Morningstar EAA USD Moderate Allocation. Peer group median has been adjusted for USDGBP hedging costs and is expressed in GBP. Past performance is not a guide to future performance. Performance is calculated on a total return basis, net of all fees in GBP.
