

# Harmony Global Growth Fund (Class A-C USD)

31 December 2025

This is a marketing communication for professional advisors only

## Investment objective\*

The portfolio will be biased to investments in the United States, but could also hold investments outside this country.

The investment objective is to provide capital growth in US dollar terms but with a reduced level of volatility, via strategic exposures to a wide range of asset classes.

## Manager commentary

» In December, we added the Global Evolution Emerging Markets Blended High Conviction Fund to the portfolio, which invests across the full spectrum of emerging market debt through four equal-weight sleeves drawn from the firm's four flagship strategies. The fund combines top-down macro themes with bottom-up country and security selection to identify relative value across hard and local currency sovereign, corporate, and frontier market debt. Supported by a long-tenured team with deep emerging markets expertise, the strategy aims to deliver attractive risk-adjusted returns with yields in the low double digits. We switched into this from the existing passive emerging market debt exposures; hence, we believe this portfolio change to be not only return enhancing (thanks to the higher yield), but also risk reducing (with the increased diversification benefits, and a natural advantage in the case of prolonged US dollar weakness).
