

# Harmony Global Growth Fund (Class E EUR hedged)

31 December 2025

This is a marketing communication for professional advisors only

## Investment objective\*

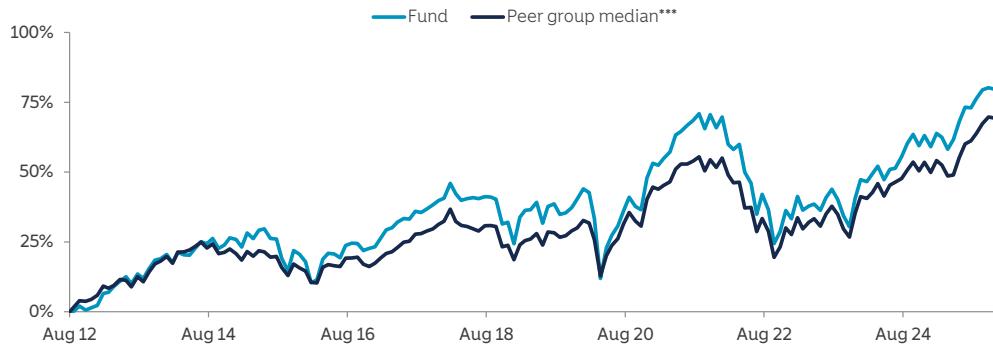

The portfolio will be biased to investments in the United States, but could also hold investments outside this country.

The investment objective is to provide capital growth in US dollar terms but with a reduced level of volatility, via strategic exposures to a wide range of asset classes.

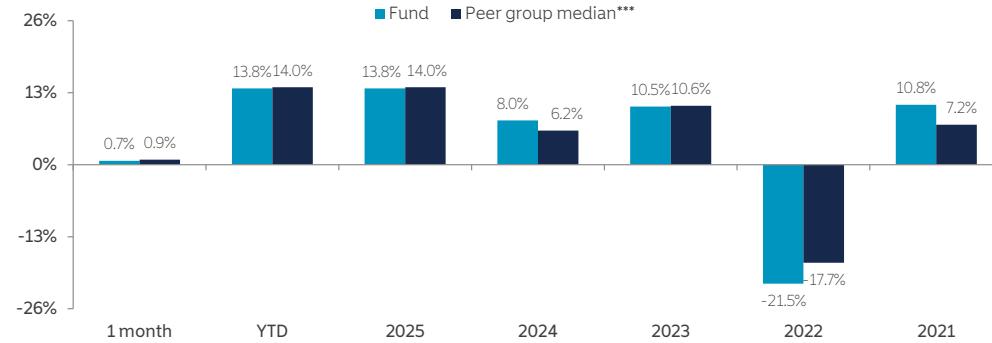

## Manager commentary

» In December, we added the Global Evolution Emerging Markets Blended High Conviction Fund to the portfolio, which invests across the full spectrum of emerging market debt through four equal-weight sleeves drawn from the firm's four flagship strategies. The fund combines top-down macro themes with bottom-up country and security selection to identify relative value across hard and local currency sovereign, corporate, and frontier market debt. Supported by a long-tenured team with deep emerging markets expertise, the strategy aims to deliver attractive risk-adjusted returns with yields in the low double digits. We switched into this from the existing passive emerging market debt exposures; hence, we believe this portfolio change to be not only return enhancing (thanks to the higher yield), but also risk reducing (with the increased diversification benefits, and a natural advantage in the case of prolonged US dollar weakness).

The value of the underlying funds and the income generated from them can go down as well as up and is not guaranteed. Investors may not get back the original amount invested. The value of investments involving exposure to foreign currencies can be affected by currency exchange rate fluctuations. Portfolio holdings include indirect holdings in Momentum GF Global Equity Fund. \*\*Performance figures prior to the inception date of the Class E EUR Hedged share have been simulated by applying USDEUR hedging costs to the non-hedged returns of Harmony Global Growth Fund Class E USD. \*\*\*Peer group median comprises two components: 1) between inception date and 30.06.24, the median return of the composite (i) global peers and (ii) local peers, in the ratio 1:2. This weighting methodology is consistent with the "normal" asset allocation of the Fund, with a two-thirds bias towards "home" country assets and currencies; 2) between 01.07.24 to present, the median return of Morningstar EAA USD Aggressive Allocation. Peer group median has been adjusted for USDEUR hedging costs and is expressed in EUR. Past performance is not a guide to future performance. Performance is calculated on a total return basis, net of all fees in EUR.
