

Harmony Sterling Balanced Fund (Class H)

28 August 2026

This is a marketing communication for professional advisors only

Investment objective*

The portfolio will be biased to investments in the United Kingdom, but could also hold investments outside this country.

The portfolio aims to provide a balance between capital preservation and capital growth in sterling with a reduced level of volatility, via strategic exposures to a wide range of asset classes.

		Cash & equivalents	1.4%

Manager commentary

- » We added to gold tactically in June after a period of weakness left the metal appearing oversold on technical indicators. Following a strong rebound, we took partial profits in August, locking in a gain of approximately 8% from our purchase price. While valuations became less compelling in the short term, we retained some exposure given ongoing support from geopolitical uncertainty and diversification demand. We also remain broadly underweight relative to our strategic allocation targets.
- » On the manager selection front, we switched from the iShares MSCI Emerging Markets Value Factor ETF to the Neuberger Emerging Market Equity strategy. This was largely a like-for-like trade, as Neuberger employs a valuation-driven stock selection process that provides a similar style exposure to the ETF. Although the fund launched only a few months ago, it is managed by an experienced team we know well and is based on a strategy to which we have previously had exposure. We believe the strategy complements our existing roster of active emerging market equity managers and has the potential to deliver strong risk-adjusted returns over the long term.

Portfolio holdings - top 20
