

Harmony Sterling Balanced Fund (Class E)

31 March 2026

This is a marketing communication for professional advisors only

Investment objective*

The portfolio will be biased to investments in the United Kingdom, but could also hold investments outside this country.

The portfolio aims to provide a balance between capital preservation and capital growth in sterling with a reduced level of volatility, via strategic exposures to a wide range of asset classes.

Manager commentary

- » March was dominated by the US-Israel/Iran conflict and the closure of the Strait of Hormuz, which sent Brent crude surging past \$100 a barrel. Global equities sold off broadly whilst government bonds yields rose sharply as markets repriced inflation higher and pushed out rate cut expectations. Bonds and precious metals offered little shelter; energy was the sole bright spot. Against this backdrop, there was significant activity in the Portfolio.
- » In early March, as the conflict started, we moved to a more defensive stance in fixed income, cutting US and European duration and reallocating into money markets. This reflected a weaker rates outlook – especially for long duration – where low term premia, poor sentiment and the risk of fewer US cuts left returns looking unattractive versus risk. Later in the month, where we thought expectations had moved too much in the opposite direction, we added some duration back, in particular by adding a modest UK Gilt exposure, funded from cash. Still, overall duration remains underweight. We also initiated a position in the Assenagon Alpha Volatility, funded by trims to investment grade credit, property and infrastructure. The dispersion-based strategy seeks to monetise mispricing between index and single-stock options, delivering an effectively long-volatility profile with limited carry cost. We sized it below our longer-term target as volatility had already risen and some gains had materialised, but we now see limited downside if volatility eases given elevated equity dispersion. Separately, we switched from Schrodgers EM Value into the iShares EM Value ETF ahead of the fund's closure.

Cumulative returns (since inception, 06.08.2012)

Important Information - All data sourced from Momentum Global Investment Management, J.P. Morgan SE - Luxembourg Branch, Morningstar, Bloomberg Finance L.P. Allocations subject to change. *There can be no assurance that the Fund will achieve its investment objective. Please refer to the Prospectus for full details of the Fund, its charges, the investment objective and investment policy. **Peer group median comprises two components: 1) between inception date and 30.06.24, the median return of the composite (i) global peers and (ii) local peers, in the ratio 1:2. This weighting methodology is consistent with the "normal" asset allocation of the Fund, with a two-thirds bias towards "home" country assets and currencies; 2) between 01.07.24 to present, following the Strategic Asset Allocation changes, the median return of Morningstar EAA GBP Allocation 40-60% Equity. Past performance is not a guide to future performance. Performance is calculated on a total return basis, net of all fees.
