

Harmony Sterling Balanced Fund (Class D)

30 May 2025

This is a marketing communication for professional advisors only

Investment objective*

The portfolio will be biased to investments in the United Kingdom, but could also hold investments outside this country.

The portfolio aims to provide a balance between capital preservation and capital growth in sterling with a reduced level of volatility, via strategic exposures to a wide range of asset classes.

Manager commentary

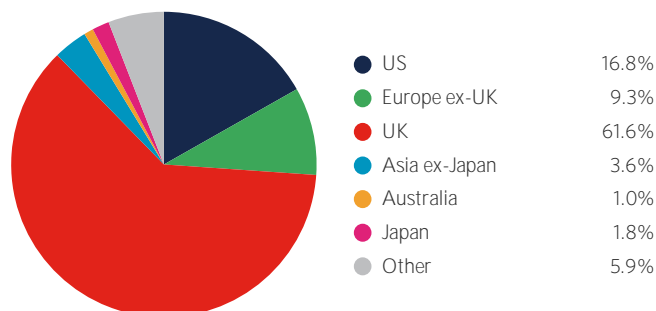

- » In May, markets rallied as fears of a trade war receded, buoyed by positive AI developments. This "TACO" (Trump Always Chickens Out) theme saw US-China tariff de-escalation, boosting equities, particularly US tech giants like Nvidia. However, government debt sustainability concerns in the US, UK, and Japan pushed long-term bond yields to multi-year highs, causing bond markets to struggle. Central banks remain cautious on rate cuts amid resilient economies and persistent inflation. While short-term uncertainty lingers, the corporate sector's strength and the transformative potential of AI provide a more encouraging long-term outlook.
- » Against this backdrop, we implemented two tactical trades in the portfolio.
- » Firstly, in the second half of the month, we reduced some of the equity positions that we had increased allocation to in early April, in the depths of the tariff crash. We had let them successfully run overweight for 6 weeks, after which we thought it prudent to bank the profits and look at opportunities elsewhere.
- » Only a few days later, in fact, we invested in a 30-year inflation-protected US bond. With bond yields spiking and market sentiment probably excessively negative about US fixed income, we thought it prudent to take a contrarian view and took the opportunity to bring the portfolio's interest-rate sensitivity back in line with strategic levels, which increases yield generation and enhances protectiveness.

Deferred Subscription Charge - Class D only

The Fund is permitted to make a charge on the sale of Shares to an investor of 5 per cent of the amount subscribed. The amount of this charge is paid by the Fund at the time of the subscription and is deferred and amortised over a 5-year period. Shareholders of Share Class D see the cost of this charge reflected in a decreased Net Asset Value price of Share Class D.

Should an investor redeem before the 5-year period has elapsed, the Fund is permitted to deduct the remainder of the Deferred Subscription Charge from the redemption proceeds for the benefit of the relevant Fund. The remaining charge will be calculated on a first in, first out basis and pro-rata dependent upon the number of Shares redeemed.

Charges will be applied to the redemption proceeds as below:

» Within one year of initial subscription	5%
» Between 1 & 2 years of initial subscription	4%
» Between 2 & 3 years of initial subscription	3%
» Between 3 & 4 years of initial subscription	2%
» Between 4 & 5 years of initial subscription	1%
» After 5 years of initial subscription	No charge

At the end of the month following the five-year anniversary of the original subscription, once the initial charge is repaid in full to the Fund, any remaining shareholding will be automatically converted to Share Class A.

Please refer to the Deferred Subscription Charge section of the prospectus for further details.
