

# Harmony Sustainable Growth Fund (Class E AUD)

31 October 2024

This is a marketing communication for professional advisors only

## Investment objective\*

To provide capital growth in US Dollar terms but with a reduced level of volatility via strategic exposures to a wide range of asset classes. The Fund aims for a better sustainability profile compared to relevant broad market indices for the majority of asset class exposures by integrating ESG (i.e. Environmental, Social and corporate Governance) factors.

The Sub-fund takes sustainability risk and ESG characteristics into account as part of its selection process. In that respect, the Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. For the assessment, areas like corporate strategy, corporate governance, transparency and the product and service range of a company are taken into account. More information can be found in the Prospectus.

## Manager commentary

- » In October, the most significant shift was a big rise in bond yields, reversing much of the move in Q3, which meant that bonds had a poor month, in turn weighing on valuations across most asset classes (with the notable exception of gold). Against this backdrop, trading activity was significant in October.
- » We added the Candriam Global High Yield fund, a strategy focused on the higher quality, less cyclical and more sustainable parts of the high yield fixed income universe which, coupled with falling inflation, easier monetary policy and a supportive macroeconomic environment, should deliver strong risk-adjusted returns.
- » Early in the month, we reduced the portfolio's duration by taking profits on some of the US Treasury allocation, which proved timely as bonds kept falling over the subsequent weeks.
- » We exited the First Sentier Japan Focus fund, as the fund is closing and the investment team leaving, and reinvested the proceeds across our global sustainable equity managers, to keep unchanged our exposure to developed equities.
