

# Harmony Sustainable Growth Fund (Class E EUR)

31 December 2024

This is a marketing communication for professional advisors only

## Investment objective\*

To provide capital growth in US Dollar terms but with a reduced level of volatility via strategic exposures to a wide range of asset classes. The Fund aims for a better sustainability profile compared to relevant broad market indices for the majority of asset class exposures by integrating ESG (i.e. Environmental, Social and corporate Governance) factors.

The Sub-fund takes sustainability risk and ESG characteristics into account as part of its selection process. In that respect, the Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. For the assessment, areas like corporate strategy, corporate governance, transparency and the product and service range of a company are taken into account. More information can be found in the Prospectus.

## Manager commentary

- » In December, portfolio activity was elevated as interesting opportunities as well as new risks presented themselves.
- » Firstly, we were of the view that markets were underestimating the stickiness of inflation and both inflation expectations and bond yields were going to move higher in the coming weeks. So, within government bonds, we shifted some exposure from long duration bonds to the central part of the yield curve, lowering the average maturity of our bond allocation and being less exposed to the risk of rising bond yields.
- » Still within fixed income, we took from investment grade bonds and reallocated to convertible bonds, a view that both us and our AI-driven allocation tool agreed on. Convertibles are an asset class we have been tactical about for a few years (last held during and after the COVID pandemic), and now they offer good diversification benefits thanks to their convexity (downside protection of a corporate bonds, upside potential of a stock), which comes useful in periods of volatile markets like today.
- » The net result, was a reduction in cash, which we had been holding onto in the previous months whilst waiting for the right opportunity to spend it.
