

Harmony Sustainable Growth Fund (Class E EUR)

30 September 2024

This is a marketing communication for professional advisors only

Investment objective*

To provide capital growth in US Dollar terms but with a reduced level of volatility via strategic exposures to a wide range of asset classes. The Fund aims for a better sustainability profile compared to relevant broad market indices for the majority of asset class exposures by integrating ESG (i.e. Environmental, Social and corporate Governance) factors.

The Sub-fund takes sustainability risk and ESG characteristics into account as part of its selection process. In that respect, the Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. For the assessment, areas like corporate strategy, corporate governance, transparency and the product and service range of a company are taken into account. More information can be found in the Prospectus.

Manager commentary

- » In September, markets were all about central banks as the long awaited first cut by the Federal Reserve came. Equities saw a correction in the first week, but mostly recovered ground and ended the month in positive territory. In local currency terms, the US outperformed, Europe was about flat, and UK and Japan were slightly negative. Global bonds ended the month in positive territory, and gold was once again the best performer. Property and infrastructure also delivered strong gains, ahead of global equities. The notable market development was the surprise policy announcement from the People's Bank of China, that with strong monetary and fiscal stimuli spurred an aggressive rally in local equities, just before month end.
- » Against this backdrop, we left the portfolios' asset allocation and manager selection roughly unchanged.
