

Harmony US Dollar Balanced Fund (Class A-C)

31 January 2024

This is a marketing communication for professional advisors only

Investment objective*

The portfolio will be biased to investments in the United States, but could also hold investments outside this country.

The portfolio aims to provide a balance between capital preservation and capital growth in US dollars with a reduced level of volatility, via strategic exposures to a wide range of asset classes.

Manager commentary

» Markets began to consolidate in January and returns ended the month in a more mixed fashion, compared to the ' (almost) everything rally ' seen in Q4 2023. Global developed and US equities both continued their momentum to reach all-time highs, returning 1.2% and 1.7% respectively. Equity markets in Asia continued to show limited signs of agreement, with Japan posting a 7.8% return, while further challenges in China impacted Emerging Asia, falling 5.2%. UK equities ended the month down 1% after some varied data prints, while European equities outperformed, returning 1.9%. After the bond market rally in December, markets took a step back with global bonds declining 1.3%, following a re-assessment of 2024 interest rate projections. Despite a shaky start, credit markets ended the month undisturbed with a slight 0.2% decline in investment grade. In commodities, a tumultuous month geopolitically, led to a 6.1% rise in oil.

» Against this backdrop, we left manager selection and asset allocation unchanged in the portfolio, after a very active last month of the year.
