Investment objectives and goals

The Fund aims to outperform the MSCI World Index over a rolling 3-year period by investing in a diversified portfolio substantially consisting of shares (equities) listed on international stock exchanges. There is no guarantee that this objective will be achieved over the indicated period, or any other period, and the capital value of the Fund is at risk. The Fund will be actively managed and may be substantially invested in securities contained in the MSCI World Index as a result of such active management. However, the performance of the MSCI World Index will be without direct impact on the portfolio. Any income generated will be reinvested.

Please refer to the Prospectus for full details of the fund, its charges, the investment objective and investment policy.

■ Manager commentary

In April 2026, the Momentum GF Global Equity Fund gained 8.9% in US dollar terms, underperforming the MSCI World Index, which gained 9.6% over the month.

The market delivered strong returns as perceived risk related to the Iran conflict receded. Both sides entered negotiations and agreed to a ceasefire. The primary driver of performance was the semiconductor sector, which gained over 29%. Nvidia lagged its peers, rising a relatively modest 14% compared with Broadcom (+35%), Advanced Micro Devices (+74%), and Micron Technology (+53%). The Fund has exposure to each of these companies, although at lower weights than the elevated index levels.

Within Communication Services, exposure to entertainment stocks proved a key headwind, with Nintendo notably weak over the period as component costs continue to hurt margins. This was only partially offset by strong contributions from digital advertising and platform businesses, including Alphabet.

The Fund maintains a balanced exposure across styles and regions, with a continued focus on fundamentals and valuation discipline. Given the ongoing concentration of risk within the index, we view the Fund's diversification as an important tool to protect capital during a period of heightened speculation.

■ Deferred subscription charge - class D only

The Fund is permitted to make a charge on the sale of Shares to an investor of 5 per cent of the amount subscribed. The amount of this charge is paid by the Fund at the time of the subscription and is deferred and amortised over a 5-year period. Shareholders of Share Class D see the cost of this charge reflected in a decreased Net Asset Value price of Share Class D.

Should an investor redeem before the 5-year period has elapsed, the Fund is permitted to deduct the remainder of the Deferred Subscription Charge from the redemption proceeds for the benefit of the relevant Fund. The remaining charge will be calculated on a first in, first out basis and pro-rata dependent upon the number of Shares redeemed.

Charges will be applied to the redemption proceeds as below:

Within one year of initial subscription	5%
Between 1 & 2 years of initial subscription	4%
Between 2 & 3 years of initial subscription	3%
Between 3 & 4 years of initial subscription	2%
Between 4 & 5 years of initial subscription	1%
After 5 years of initial subscription	No charge

At the end of the month following the five-year anniversary of the original subscription, once the initial charge is repaid in full to the Fund, any remaining shareholding will be automatically converted to Share Class A.

Please refer to the Deferred Subscription Charge section of the prospectus for further details.
