Investment objective

The Fund aims to outperform the MSCI World Index over a rolling 3-year period by investing in a diversified portfolio substantially consisting of shares (equities) listed on international stock exchanges. There is no guarantee that this objective will be achieved over the indicated period, or any other period, and the capital value of the Fund is at risk. The Fund will be actively managed and may be substantially invested in securities contained in the MSCI World Index as a result of such active management. However, the performance of the MSCI World Index will be without direct impact on the portfolio. Any income generated will be reinvested.

Please refer to the Prospectus for full details of the fund, its charges, the investment objective and investment policy.

■ Manager commentary

In December 2024, the Momentum GF Global Equity Fund fell by 3.2% in US dollar terms, underperforming the MSCI World Index, which fell by 2.6%.

December was a strong month for growth and large-cap stocks relative to other styles. The MSCI World Growth index was up 1% over the month, while all other styles were negative, including value (-6%), quality (-3%), and minimum volatility (-5%). Once again, this market was driven by the Magnificent Seven stocks, with Tesla (+17%), Alphabet (+12%) and Apple (+5.5%) leading the way. The Portfolio has around 13% allocated to the Magnificent Seven, so it benefited in an absolute sense. However, as the index remains incredibly concentrated with over a 23% allocation to these seven stocks, they were the most significant contributors to the negative relative performance.

Positive contributors to performance came from European banks, with UniCredit (+4%), Societe Generale (+6%), and BNP Paribas (+2.5%) performing well as profits remained strong and speculation around M&A activity increased. Energy stocks were under pressure during the month as oil prices remained near two-year lows. However, the Fund's underweight position and positive stock selection in this sector added around 11 basis points of alpha.

■ Deferred subscription charge - class D only

The Fund is permitted to make a charge on the sale of Shares to an investor of 5 per cent of the amount subscribed. The amount of this charge is paid by the Fund at the time of the subscription and is deferred and amortised over a 5-year period. Shareholders of Share Class D see the cost of this charge reflected in a decreased Net Asset Value price of Share Class D.

Should an investor redeem before the 5-year period has elapsed, the Fund is permitted to deduct the remainder of the Deferred Subscription Charge from the redemption proceeds for the benefit of the relevant Fund. The remaining charge will be calculated on a first in, first out basis and pro-rata dependent upon the number of Shares redeemed.

Charges will be applied to the redemption proceeds as below:

▪ Within one year of initial subscription	5%
▪ Between 1 & 2 years of initial subscription	4%
▪ Between 2 & 3 years of initial subscription	3%
▪ Between 3 & 4 years of initial subscription	2%
▪ Between 4 & 5 years of initial subscription	1%
▪ After 5 years of initial subscription	No charge

At the end of the month following the five-year anniversary of the original subscription, once the initial charge is repaid in full to the Fund, any remaining shareholding will be automatically converted to Share Class A.

Please refer to the Deferred Subscription Charge section of the prospectus for further details.
