## Investment objective

The Fund aims to outperform the MSCI World Index over a rolling 3-year period by investing in a diversified portfolio substantially consisting of shares (equities) listed on international stock exchanges. There is no guarantee that this objective will be achieved over the indicated period, or any other period, and the capital value of the Fund is at risk. The Fund will be actively managed and may be substantially invested in securities contained in the MSCI World Index as a result of such active management. However, the performance of the MSCI World Index will be without direct impact on the portfolio. Any income generated will be reinvested.

Please refer to the Prospectus for full details of the fund, its charges, the investment objective and investment policy.

## ■ Manager commentary

In December 2025, the Momentum GF Global Equity Fund gained 0.6% in US dollar terms, slightly behind the MSCI World index, which rose 0.8%.

Value stocks led markets during the month, with large-cap value rising almost 2% while large-cap growth fell 0.15%. Performance was driven primarily by strong gains in Financials (+5%), as banks benefited from robust earnings, and Materials (+4%), supported by higher metals prices. The Technology sector edged lower (-0.1%) despite Nvidia rising 5%, as this was offset by declines in other mega caps such as Apple (-2.5%) and Microsoft (-1.8%).

Against this backdrop, the Fund's value-oriented managers performed well, with Artisan outperforming the benchmark by 2.8%, Morant Wright by 2.3% and Lyrical by 0.4%. The Portfolio's underweight position in the US was also supportive, as the S&P 500 was flat over the month, while UK and European equities rose 4% and Asia gained 3%. The Fund's exposure to quality stocks lagged as defensive and low volatility stocks struggled in the more cyclically driven market.

At the stock level, Samsung rose 19% after earnings surprised on the upside, driven by strong demand for memory chips amid the ongoing AI-led semiconductor upcycle.

In contrast, Nintendo shares fell 20% in December following a strong year driven by record sales of its newly launched Switch 2 console. The share price weakness reflected rising component costs, particularly memory. This cost pressure is linked to the broader AI memory supercycle, as hyperscalers have diverted supply toward data centre and AI applications, reducing the availability of affordable capacity for consumer electronics manufacturers.

## ■ Deferred subscription charge - class D only

The Fund is permitted to make a charge on the sale of Shares to an investor of 5 per cent of the amount subscribed. The amount of this charge is paid by the Fund at the time of the subscription and is deferred and amortised over a 5-year period. Shareholders of Share Class D see the cost of this charge reflected in a decreased Net Asset Value price of Share Class D.

Should an investor redeem before the 5-year period has elapsed, the Fund is permitted to deduct the remainder of the Deferred Subscription Charge from the redemption proceeds for the benefit of the relevant Fund. The remaining charge will be calculated on a first in, first out basis and pro-rata dependent upon the number of Shares redeemed.

Charges will be applied to the redemption proceeds as below:

▪ Within one year of initial subscription	5%
▪ Between 1 & 2 years of initial subscription	4%
▪ Between 2 & 3 years of initial subscription	3%
▪ Between 3 & 4 years of initial subscription	2%
▪ Between 4 & 5 years of initial subscription	1%
▪ After 5 years of initial subscription	No charge

At the end of the month following the five-year anniversary of the original subscription, once the initial charge is repaid in full to the Fund, any remaining shareholding will be automatically converted to Share Class A.

Please refer to the Deferred Subscription Charge section of the prospectus for further details.
