Investment objectives and goals

The Fund aims to outperform the MSCI World Index over a rolling 3-year period by investing in a diversified portfolio substantially consisting of shares (equities) listed on international stock exchanges. There is no guarantee that this objective will be achieved over the indicated period, or any other period, and the capital value of the Fund is at risk. The Fund will be actively managed and may be substantially invested in securities contained in the MSCI World Index as a result of such active management. However, the performance of the MSCI World Index will be without direct impact on the portfolio. Any income generated will be reinvested.

Please refer to the Prospectus for full details of the fund, its charges, the investment objective and investment policy.

■ Manager commentary

The Fund declined 1.4% in AUD terms in July, underperforming the MSCI World Index, which declined 0.9% over the month.

Market leadership broadened during the month as investors rotated away from some of the most crowded AI and semiconductor-related positions following an exceptionally strong first half of the year. Several technology hardware, software, and semiconductor companies experienced profit-taking as investors reassessed valuation expectations, creating a more challenging environment for portfolios with exposure to these areas.

At the sector level, Consumer Discretionary, Financials, and Communication Services were the largest positive contributors to relative performance. Within Consumer Discretionary, the Fund's underweight position in Tesla added value. The shares fell 26% despite record deliveries and revenue growth, as operating margins declined significantly. Quality stocks, which have lagged over the past couple of years, returned to favour in July. Data and information services businesses, which had derated significantly due to perceived threats from AI, performed strongly, including holdings such as Experian, RELX, and Wolters Kluwer.

The largest detractor was Information Technology, where both allocation and stock selection weighed on performance. Positions in Samsung Electronics, Renesas Electronics, Taiwan Semiconductor Manufacturing, SK Hynix, and Nebius Group detracted as investor sentiment towards the AI theme weakened during the month.

Overall, positive stock selection across Consumer Discretionary, Financials, and Communication Services was insufficient to offset the headwind from Information Technology. The month highlighted the impact of short-term rotations within technology markets, although the portfolio remains focused on high-quality businesses with attractive long-term growth prospects.
