

Momentum Real Assets Growth & Income Fund Class A GBP

27 February 2026

This is a marketing communication for professional advisors only

Investment objective*

The portfolio aims to achieve a total return of at least 7% per annum including income of at least 3% per annum over the recommended minimum investment horizon (6 years).

The Fund will be actively managed, seeking to achieve its investment objective or gaining exposure to 'real assets' such as real estate or infrastructure related assets by primarily investing in listed companies, including Investment Trusts and Real Estate Investment Trusts (REITs), collective investment schemes and other similar schemes. This encompasses a range of asset classes and currencies in varying proportions over time, with an overall bias towards asset classes that have the potential for capital growth.

Manager commentary

- February proved to be a volatile month for markets, shaped by a sharp escalation in geopolitical tensions and continued uncertainty around global growth and inflation. The most significant development came at the end of the month as tensions between the US and Iran escalated, prompting a sharp rise in oil prices amid concerns about potential disruption to energy supplies through the Strait of Hormuz.
- Against this backdrop, the Fund delivered positive returns over the month. Specialist assets performed well, benefitting in part from their perceived defensive characteristics and sensitivity to bond market moves.
- Within defensive assets, nominal and index-linked gilts generated positive returns, providing support for the portfolio. Uncorrelated strategies also contributed positively, with BH Macro performing well over the period. The Fund exited its gold position at the start of the month following a period of very strong performance and record highs in the gold price, reallocating proceeds to BH Macro to maintain diversification.
- Within specialist assets, property was the highest performing sub asset class. Segro was the Fund's top contributor after reporting strong operational results. The company secured a record £99m of new headline rent during the year. Strong asset management activity supported 6% like-for-like rental growth, with UK rent reviews and renewals delivering particularly strong uplifts. Portfolio occupancy also improved over the period. Development completions added further rental income potential, while the company continues to expand its data centre pipeline. Adjusted earnings per share increased by 6.1% and the full-year dividend was raised by 6.1%, alongside growth in net asset value.
