Momentum Real Assets Growth & Income Fund Class A GBP

30 October 2026

This is a marketing communication for professional advisors only

Investment objective*

The portfolio aims to achieve a total return of at least 7% per annum including income of at least 3% per annum over the recommended minimum investment horizon (6 years).

The Fund will be actively managed, seeking to achieve its investment objective or gaining exposure to 'real assets' such as real estate or infrastructure related assets by primarily investing in listed companies, including Investment Trusts and Real Estate Investment Trusts (REITs), collective investment schemes and other similar schemes. This encompasses a range of asset classes and currencies in varying proportions over time, with an overall bias towards asset classes that have the potential for capital growth.

Cash	1.4%

Manager commentary

» October saw a more cautious backdrop for financial markets as concerns shifted towards the technology sector, particularly the scale and financing of investment in artificial intelligence infrastructure. The resulting risk-off rotation weighed on some of the more growth-oriented areas of the market, while government bonds recovered slightly.

» Property was the strongest area of the portfolio. Primary Health Properties announced a joint venture (JV) with global institutional investor GIC. The JV partnership will acquire a £700 million portfolio of private hospitals from the company, once leverage is applied in the JV it should generate around £500 million of proceeds that are expected to be used by PHP to reduce its own balance sheet debt following its acquisition of Assura. Consequently, the balance sheet is strengthened whilst retaining management fee income through the 50% interest in the JV. British Land also performed strongly, rising 6.7%, while LondonMetric Property, NewRiver REIT and Supermarket Income REIT contributed positively.

» Private equity produced more mixed returns as weaker sentiment towards technology and growth-oriented investments weighed on several holdings. Molten Ventures, Chrysalis Investments and Schroders Capital Global Innovation Trust declined during the month. In contrast, Oakley Capital Investments gained 3.8% following a partial sale of underlying fund interests and a third-quarter update showing a 1.2% increase in net asset value per share.

» Defensive assets provided some balance during the more risk-averse environment. Conventional and inflation-linked UK government bonds gained as yields declined, while BH Macro also contributed positively. This partially offset weakness in gold, which fell sharply during the month.
