A.I. MACHINES
GLOBAL MANAGED RISK FUND
("AIM GMR")

This document is marketing material. Investors should also read the Key Information Documents, Prospectus and Supplement prior to investing.

MONTHLY REPORT (FACTSHEET & MDD)

30 SEP 2026

USD (I2 USD Base Acc - ISIN: IE00B94Q3M90)

FIRM

A.I. Machines is a London-based independent investment advisory and financial technology firm pioneering AI-powered investment strategies.

Our Mission is to smooth investment journeys and enhance outcomes over a market cycle, through AI-generated investment signals offering real diversification to existing strategies.

PIE is our proprietary AI investment and risk management engine, operating live since 2017. It generates portfolio management signals and adapts its assessments as market conditions evolve, while governed by human oversight and execution.

Our Team combines decades of expertise in investment management, quantitative finance, and AI.

FUND PURPOSE

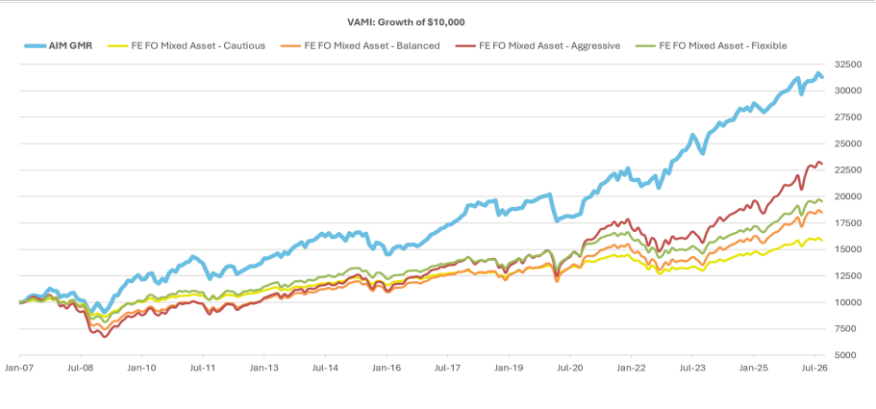

Over a full market cycle, the Fund aims to provide **a 4-in-1 core portfolio diversifier, offering 4 key suitability criteria,** matchable across the investment portfolio risk-profile spectrum via a single fund with a:

1. **Similar** Total Return **(Outcome)** profile **to Aggressive funds**
2. **Similar** Standard Deviation **(Tolerance-To-Risk)** profile **to Balanced funds**
3. **Similar** Maximum Drawdown **(Capacity-For-Loss)** profile **to Cautious funds**
4. **Shorter** Drawdown Duration **(Time-In-Loss)** profile **than Aggressive, Balanced and Cautious funds**

FUND HIGHLIGHTS

- **Global Tactical Asset Allocation strategy**
- **Powered by artificial intelligence (machine learning)**
- Designed to reduce the impact of emotional and behavioural biases in investment decisions
- Longest AI-powered fund track record in the world
- Diversifying your existing human portfolio manager- and strategic asset allocation risks
- Simple portfolio requiring only 2 asset classes & 3 instruments **(Passive Index Equities and Cash)**
- Tactically able to move global equity (MSCI World) exposure between 10-90% daily
- No direct risk of bond, property or commodity bear markets
- High liquidity, no leverage or currency risks

PERFORMANCE INFORMATION

Source: *FE Analytics.* ***Basis:*** *NAV based, total return, net of fees in Local Currency.* ***Period:*** *AIM GMR since strategy inception ("SSI") on 31.01.2007 to report date.*
Performance from 31.05.2017 to date is powered by A.I. Machines' artificial intelligence investment engine.
Please note: The Fund's mandate allows for tactical global equity index (MSCI World) exposure ranging from as little as 10% to as much as 90% on a weekly basis. Therefore, from time-to-time, investors may be under or over-exposed to equity markets vs. its typical Cautious (30%), Balanced (50%) or Aggressive (70%) portfolio peers.
Past performance does not predict future returns. The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.

GLOSSARY

Standard Deviation (Aka Volatility): Indicates a fund's return volatility over a specific period. It tells you how much the fund's returns deviate from its average (mean) return and is commonly used as a basic measure of risk. When a fund has a high standard deviation, the predicted range of performance is wide, implying greater volatility.
Sharpe Ratio: Shows how much return a fund provides you for the risk taken. A higher Sharpe Ratio means better risk-adjusted performance—more reward for each unit of risk (in Volatility terms) taken.
Downside Deviation: Measures the volatility of a fund's negative returns only, showing how much returns fall below a minimum acceptable rate, helping investors assess downside risk more precisely than standard deviation.
Sortino Ratio: Shows how much return a fund gives you for the downside risk you take. Unlike the Sharpe ratio, it only counts bad (downside) volatility, making it more focused on protecting losses.
Maximum Drawdown: Shows the biggest drop a fund has had from a peak to a low. It tells you the worst loss investors faced before the fund started recovering.
Maximum Drawdown Recovery Speed: Show how fast the fund recovered from its worst (Maximum) drawdown, back to its previous peak.
Maximum Drawdown Duration: Shows how long investors waited to break even from the fund's highest NAV before it experience its largest drawdown and back to its previous high peak again.
Longest Drawdown Duration: Shows the longest period a fund stayed below its previous peak. It shows how long an investor waited to recover losses and return to their former highest NAV.
Average of All Drawdowns: Measures the average decline from a peak to a subsequent trough across all drawdown events.
Average Drawdown Duration: Average number of time periods (e.g., months) it takes for a portfolio to recover from each drawdown.
Ulcer Index Ratio: It's used to evaluate how well an investment delivers returns relative to the depth and duration of drawdowns. A higher Ulcer Index Ratio indicates more efficient performance per unit of downside risk, as it reflects greater returns relative to the depth and duration of drawdowns.
NAV (Net Asset Value): Is the price per specific share of a fund. It's calculated by dividing the fund's total assets minus liabilities by the number of shares, showing what each unit is worth.
AMC (Annual Management Charge): Is the yearly fee an Investment Manager charges for managing your money. It's taken as a percentage of your investment and includes things like research and portfolio management.
TER (Total Expense Ratio): Shows the total annual cost of running a fund, expressed as a percentage of assets. It includes management fees and other expenses, helping investors understand what they're paying to invest.
OCF (Ongoing Charges Figure): Shows a comprehensive annual cost of investing in a fund, including management, admin, etc. fees. It helps investors understand how much is deducted from returns to cover running the fund.
YTD (Year to Date): Shows how much a fund has gained or lost since the start of the current calendar year. It helps investors see recent performance up to the current reporting date.
Short Future: It's a financial derivate instrument used to profit from or protect a portfolio against negative market movements. The fund profits if prices drop, helping hedge risk or take advantage of downturns.
Currency Hedge: A strategy using derivatives to reduce currency risk. It aims to protect investors from losses caused by exchange rate movements between the fund's base currency and an investor's share class currency.
Net Equity Exposure: Shows how much of a fund's value is invested in equities after subtracting any short positions. It tells you the fund's overall exposure to the ups and downs of the stock market.
Reporting Status (UK): Granted by the UK's HMRC (Her Majesty's Revenue & Customs) to offshore funds that meet certain transparency and reporting requirements. If a fund has reporting status, UK investors may benefit from more favourable capital gains tax treatment when they dispose of their fund holdings.
SFDR (Sustainable Finance Disclosure Regulation): IEU rule requiring funds to show how they consider environmental, social, and governance (ESG) factors, helping to understand a fund's sustainability objectives.
Article 6 (under SFDR): Funds that do not promote ESG characteristics or sustainability objectives specifically. They may consider ESG risks, but their main goal is financial performance.

GENERAL INVESTMENT DISCLAIMER & REGULATORY NOTICES

This document is for private circulation and informational purposes only. It does not constitute an offer to buy or a solicitation to sell any securities in any fund and should not be relied upon as investment advice. No warranty, express or implied, is given as to the accuracy or completeness of the information. Neither the Manager, Investment Manager, Investment Advisor nor the Distributor accepts liability for any consequences arising from the use of this information. Investors should seek independent financial advice, as not all investments are suitable for all individuals, and should fully understand the risks involved. Investments in the Fund are subject to market risks and can fluctuate in value. Past performance is not a reliable indicator of future results. The value of your investment and the potential income from it can fall as well as rise and you may not get back the amount originally invested. Performance figures are based on NAV-to-NAV calculations, net of fees, and assume a lump-sum investment. Actual returns may vary based on investment timing, fees, and tax treatment. A schedule of fees and charges is available on request from the Manager, Investment Advisor, Distributor, or at www.a-i-machines.com. This document is intended for investment professionals. Any other recipients should disregard its contents. It may not be reproduced, disclosed, or distributed without written consent from A.I. Machines. Products and services described herein are subject to change. The Fund is not available to U.S. persons or residents. The Fund is a sub-fund of Sanlam Universal Funds plc; an open-ended umbrella investment company incorporated in Ireland with segregated liability between sub-funds and authorised by the Central Bank of Ireland. The Fund is managed by Sanlam Asset Management (Ireland) Limited ("the Manager"), authorised as a UCITS Management Company and Alternative Investment Fund Manager under Irish law, and licensed in South Africa under Section 8 of the FAIS Act, 2002. The Manager has appointed G10 Capital Limited as Investment Manager to the Fund on 26 June 2025. Fund prices are calculated on a net asset value (NAV) basis, including income and expense accruals. Commissions or incentives may be paid on certain share classes and are for the Distributor's account. The value of participatory interests and the income derived from them may fluctuate and is not guaranteed, potentially resulting in capital loss. Artificial Intelligence Machines Ltd (FRN 1050226) acts as Investment Advisor and Distributor to the Fund and is an Appointed Representative of G10 Capital Limited (FRN 648953). G10 Capital, part of the IQEQ Group, is a full-scope Alternative Investment Fund Manager with MiFID top-up permissions and is authorised and regulated by the Financial Conduct Authority (FRN: 648953). **Country-Specific Disclosure – South Africa** - This is a Section 65 approved fund under the Collective Investment Schemes Control Act 45 of 2002 (CISCA). Sanlam Collective Investments (RF) (Pty) Ltd is the appointed South African Representative Office for the Fund. In the **UK**, this document is distributed by Artificial Intelligence Machines Ltd (FRN 1050226), an Appointed Representative of G10 Capital Limited, which is authorised and regulated by the Financial Conduct Authority (FRN 648953)
