

Build in ESG

Global Matters Weekly

21 August 2023

– Jackson Franks — Analyst

According to the International Energy Agency (IEA), real estate generates 40% of global CO₂ emissions. The sector is therefore critical to global efforts to meet the Paris Climate Agreement's target of limiting average temperature rise to well below 2°C. With two-thirds of global building stock expected to endure into the 2040's, significant investment in decarbonisation efforts across existing infrastructure is required, alongside increasingly stringent (and capital-intensive) new-build regulations. Here in the UK, the Minimum Energy Efficiency Standards (MEES) are set to tighten by 2030, with all tenanted commercial property buildings requiring an Energy Performance Certificate (EPC) rating of at least a B. Meeting these requirements will demand substantial investment as it's estimated that up to 70% of commercial property space could be at risk of non-compliance.

At Momentum we believe it is vital for the sector to manage and reduce these levels. We hold the same expectation for our Real Estate Investment Trusts (REITs) in which we invest, as well as our in-house real estate fund, MAREF (Momentum Africa Real Estate Fund).

Momentum invests both directly and indirectly into the real estate sector via MAREF, a pooled vehicle facilitating investment in African real estate for our clients and REITs. Although these are two different investment approaches, the Environment Social and Governance (ESG) criteria do not differ. Quantifying ESG criteria within the real estate sector is simpler than other sectors due to the tangible living nature of a property. Environmental factors consider water and energy consumption as well as emissions from the building. Social factors consider the societal impact of the development (infrastructure, housing, job creation etc) as well as the health and wellbeing of its occupiers. This has become an even more important factor since COVID-19. Governance factors consider aspects such as diversity and reputation which can be applied to both the landlord (if invested indirectly) and the occupiers. Additionally, safety measures such as fire safety will be applicable towards governance scores.

In MAREF, we uphold stringent ESG standards. This commitment was recognised when we received EDGE (Excellence in Design for Greater Efficiencies) certification for our assets in Ghana in April 2023. EDGE is a green building

At Momentum, we are committed to contributing to a more sustainable world, both through direct actions and indirect means

certification system developed by the International Finance Corporation (IFC). Additionally, we are working towards Leadership in Energy and Environmental Design (LEED) silver certification for our current project in Nairobi, Kenya. Similar to EDGE, LEED was developed by the US Green Building Council to set a benchmark for design, construction, maintenance, and operation of high-performance green buildings. IFC EDGE and LEED are comparable to BREEAM in the UK. In terms of the social aspect of ESG, one of MAREF's core principles is job creation. Throughout the construction period MAREF upskills staff so those with the most basic jobs can be trained in more specialist roles, thereby strengthening their future employability. MAREF prides itself on offering international Grade A standard facilities in developing markets thanks to the expertise of our sister company and developer, Eris Property Group (fellow subsidiary of Momentum Metropolitan Holdings).

The indirect investments, the REITs in which MGIM's daily dealing funds invest, have well-defined ESG policies that they strictly follow and are accountable for. Throughout our investment process, ESG principles hold significant weight as a key criterion. Not only do we expect managers to aim for the highest ESG standards, but also to provide concrete evidence demonstrating their successful efforts in implementing their ESG strategies. This proactive approach involves efficient management of energy, waste, water, materials, and carbon emissions. Such efforts are demonstrated through the day-to-day management of assets, wherein they work to minimise the carbon footprint of their portfolio while maintaining excellent service standards for their occupants.

At Momentum, we are committed to contributing to a more sustainable world, both through direct actions and indirect means. For this aspiration to be realised, it's essential for everyone to actively participate in propelling the implementation of ESG practices forward.

The Marketplace

- Global equities fell 2.5% last week
- All major world indices declined last week, and Bitcoin hit a two-month low
- Brent crude fell 2.3% to \$84.8 a barrel
- Gold fell 1.3% to \$1889.3 per ounce

Market Focus

US

- US equities fell 2.1% last week, with metal, materials and oil/ gas outperforming; whilst banks and homebuilders declined
- July meeting minutes showed that most Fed officials see “significant” upside risks to inflation that may require more tightening.
- US core retail sales month-on-month for July were 1% (-0.3% expected)
- US initial jobless claims were 239k last week (vs 240k expected)

Europe

- European equities fell 2.2% last week, with retail and telecoms outperforming industrial goods and travel/ leisure
- It was a quiet week for volumes with Assumption Day celebrated in Italy on 12 August

UK

- UK equities fell 3.4 % last week
- The June Average Earning Index and Bonus was 8.2% (vs 7.3% expected)
- Consumer Price Index (month-on-month for July was -0.4% (vs -0.5% expected)
- Core retail sales month-on-month for July was -1.2% (vs -0.5% expected)
- Annual inflation slowed in July to 6.8% from 7.9% in June, driven lower by falling energy and food prices

Asia/Rest of The World

- Crude oil inventories were -5.96m barrels (vs -2.32m expected)
- Global Emerging Market Equities fell 3.3% last week
- Japanese equities fell 2.9% despite a stronger Q2 Gross Domestic Purchase (GDP) of 1.5% (vs 0.8% expected)
- Chinese equities fell 5.6% last week
- Japan’s GDP grew by an annualized 6.0% quarter-on-quarter in the three months to the end of June 2023, far exceeding the 2.9% expansion forecast by economists
- China’s Central Bank unexpectedly lowered key interest rates as it ramped up stimulus to support a weakening economy. The Peoples Bank of China cut the rate on its one-year Medium-term Lending Facility loans by 15bps to 2.5% and lowered the seven-day reverse repo rate by 10bps to 1.8%. Fixed-asset investment from January to July was also worse than expected Separately, authorities are considering cutting the stamp duty on stock trades for the first time since 2008
- China’s state-owned property developers are sending warnings of widespread losses, fuelling concerns that the crisis is expanding. Goldman Sachs has cut its China stock targets on contagion risk from the property slump

This does not constitute an offer or solicitation to any person in any jurisdiction in which it is not authorised or permitted, or to anyone who would be an unlawful recipient.

Prospective investors should take appropriate advice regarding applicable legal, taxation and exchange control regulations in countries of their citizenship, residence or domicile which may be relevant to the acquisition, holding, transfer, redemption or disposal of any investments herein solicited.

Any opinions expressed herein are those at the date this document is issued. Data, models and other statistics are sourced from our own records, unless otherwise stated. We believe that the information contained is from reliable sources, but we do not guarantee the relevance, accuracy or completeness thereof. Unless otherwise provided under UK law, Momentum GIM does not accept liability for irrelevant, inaccurate or incomplete information contained, or for the correctness of opinions expressed.

The value of investments in discretionary accounts, and the income derived, may fluctuate and it is possible that an investor may incur losses, including a loss of the principal invested. Past performance is not generally indicative of future performance. Investors whose reference currency differs from that in which the

underlying assets are invested may be subject to exchange rate movements that alter the value of their investments.

Under our multi-management arrangements, we selectively appoint underlying sub-investment managers and funds to actively manage underlying asset holdings in the pursuit of achieving mandated performance objectives. Annual investment management fees are payable both to the multimanager and the manager of the underlying assets at rates contained in the offering documents of the relevant portfolios (and may involve performance fees where expressly indicated therein).
